

RED FISH RETREAT

Florida

How to Enjoy Your HOT TUB GUIDE

Soak. Relax. Don't do anything weird. 🐾

1 REMOVE THE COVER

Lift the cover gently and fold it back. Don't drag it on the ground or use it as a sled.

2 TURN ON THE JETS

Press the 1 or 2 button to turn on the jets.

Jets run on a timer and automatically turn off.

3 SET THE TEMPERATURE

Use the arrows to set temp to 100°-102°F. This is the sweet spot!

Seriously... 104°F = lava. You are not a lobster.

4 BEFORE YOU GET IN

Rinse off if you're sandy, salty or sunscreeny.

The hot tub is not a beach filter. We tried. It failed.

5 WHILE YOU'RE SOAKING

No glass in or around the hot tub. (Use plastic cups)

Keep water level above the jets.

Keep it chill. This is not a spring break event.

6 WHEN YOU'RE DONE

Turn the jets off.

PUT THE COVER BACK ON and secure it.

Heat escapes faster than a fish story!

A covered tub stays clean, efficient and ready for you!

7 CHEMICALS? NO THANKS!

Please do NOT add anything to the water.

- ✗ No chemicals
- ✗ No soaps
- ✗ No oils
- ✗ No "just a little" something"

We handle the science part!

8 SIT BACK & ENJOY!

Sit back, enjoy a cocktail and catch the sunset... 🐾
You've earned it.

IMPORTANT REMINDERS

Let's keep it awesome for everyone! 🐾

TOO HOT? FLORIDA SUN IS STRONG!

- ✓ Use the hose next to the tub.
- ✓ Add cold water and run the jets.
- ✓ Check temp and repeat if needed.

Please do not set temp below 90°F.

Hose is right here for easy cool down!

QUESTIONS OR ISSUES?

If water looks off or you have any questions, message us anytime. We're happy to help!

THANK YOU!

We appreciate you treating our home like your own. Have an amazing stay! 🐾

TIGHT LINES & GOOD TIMES!

RELAX. RECHARGE. YOU'RE AT RED FISH RETREAT! 🐾
